DETAILED ACTION

1. Claims 1, 4, 8-11, 15, 18-22 are pending in this application.

Allowable Subject matter

3. Claims 1, 4, 8-11, 15, 18-22 are allowed.

The examiner deems claims 1, 4, 8-11, 15, 18-22 as novel when viewed as a whole for the limitations of file management device, method and program.

The closest prior art of record, Baxter discloses, a file managing apparatus for managing files recorded on a recording medium by resorting to an index file recorded on said recording medium ([0012]); wherein said index file is formed by a series of entries constituted by blocks of extract information about said files, said extract information being arranged to correspond with said files ([0100]); wherein hierarchy management information which is set for each of said entries and which primarily points to another entry is provided to express a hierarchical structure of said files recorded on said recording medium ([0007]);

However, the prior art of record fails to anticipate or render obvious the recited feature of the limitations cited above added with wherein said index file is made up of a text entry file formed of entries of extracted text, an image entry file formed of entries of thumbnail images, and a property entry file formed of entries of properties for managing the entries of thumbnail image and the entries of extracted text, formed by a series of entries constituted by blocks of extract information about said files, said extract information the thumbnail images being arranged to correspond with said files; wherein the property entry file further includes hierarchy management information which expresses a hierarchical structure of said files recorded on said recording medium; wherein in said property group, entries concerning said files are furnished with entry-related management information which indicates relation between the entries of thumbnail images and the entries of extracted text based on the files from which the thumbnail images and the extracted text are extracted, and with file-related management information which shows relation between the files and the entries of thumbnail images and extracted text which correspond to the files;

These features, together with the other limitations of the independent claims are novel and non-obvious over the prior art of record. The dependent claims being definite, enabled by the specification, and further limiting to the independent claims, are also allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
